Filip Marczyk

I am an ambitious computer science student who has gained a solid foundation in computer science after graduating from an IT technical school. My interest in programming and modern technologies led me to be closely associated with this area. Currently, I focus my efforts on improving my programming skills, and my experience includes learning programming languages such as HTML, CSS, JavaScript, PHP, Python, and C#. For the past few months, I have been developing intensively in these areas, learning new technologies and frameworks. My goal is to become a Full-Stack Developer. I am currently looking for my first job or internship in the industry to gain experience and develop my skills.
